

PeterConnects Add-On SingleLogOn

With PeterConnects SingleLogOn when users logon to a Windows PC, SingleLogOn automatically loads the employee's profile onto the IP telephone using Extension Mobility which gives the employee access to their personal settings.

Shared office and mobile environments

With more companies downsizing their real estate needs and allowing employees flexible hours and environments, this tool is very beneficial in supporting staff members in small office spaces that need to share desk space and telephones.

SingleLogOn is sold as a separate product and works well with PeterConnects ServiceDesk.
